

Stride®

Joint Formula

Joint problems are a huge and growing concern for many people throughout the world. In fact, 70 million prescriptions and 30 billion over-the-counter joint medications are sold every year in the United States alone. The pain and decreased function and mobility that go hand-in-hand with joint issues can have a hugely negative impact on people's quality of life and lead to serious disabilities.

That's why Limitless Worldwide is so excited to offer its Stride® Joint Formula. Stride contains a unique, proprietary, ultimate joint-support complex shown in a randomized, double-blind, placebo-controlled study to significantly improve standardized measurements of joint function, stiffness, and comfort across the board after only 30 days.*

So if you're tired of living with joint-related problems and are ready for a supplement that supports healthy joint function, mobility and comfort, you need Stride.*

A randomized, double-blind, placebo-controlled study showed subjects taking the key Stride ingredient reported significantly improved scores for Western Ontario and McMaster Universities Osteo-Arthritis Index (WOMAC) measurements of joint function, stiffness and comfort. Stride helps support:

- Joint Health*
- Mobility*
- Comfort*
- Flexibility*

Science... Beyond Testimonials®

Joint Comfort, Function, and Mobility

Joint complaints such as discomfort and decreased function and mobility are an increasing concern. Seventy-million prescription medications and thirty-billion over-the-counter (OTC) medications for joint problems are sold annually in the United States alone.

Joint symptoms and related complications are a leading cause of disability. Incidences and prevalence are rising, likely related to the aging of the population and increasing obesity. Risk factors include age, sex, obesity, and genetics, as well as joint-specific factors that are likely reflective of differential "loading" of the joints (e.g. every-day activities such as typing, heavy lifting, or standing for long periods). That's where Stride comes in.

Stride®

A clinical trial was carried out on the functional Stride ingredient. This randomized, double-blind, placebo-controlled study included a study group given the functional Stride ingredient, and a group given a placebo. The groups were sex-matched and recruited from the ages of 40 to 75 years, and neither the subjects nor the investigators knew which treatments were given to which subjects.

At baseline, 30, 60, and 90 days of taking the supplements, the study subjects completed the Western Ontario and McMaster Universities Osteo-Arthritis Index (WOMAC) for scoring joint function, stiffness, and comfort. This scale was used because it is a validated, high performance instrument for evaluative research in joint health with multiple validations of its construct validity, reliability, responsiveness, and relative efficiency.

Results showed that the Stride functional compound improved WOMAC scores of joint function, stiffness, and comfort across the board, significantly outperforming the placebo after only 30 days in all of these measures.

Conclusion

Use of Stride's functional compound is the clear answer for improved joint function, mobility and comfort.* The level and credibility of the study methods, combined with the astounding significance of results across the board establish Stride as a product that stands out above all the rest.

Stride

DIRECTIONS FOR USE: Take two capsules with a full glass of water twice daily. Stride® Joint Formula may be taken with or without food.

Supplement Facts

Serving Size: 2 capsules

Servings Per Container: 60

	Amount Per Serving	%Daily Value
A Proprietary Blend Containing:	270 mg
